Formula Calm B Paste

FOR MATURE HORSES TO SUPPORT CALMING BEHAVIOR

SPECIAL INGREDIENTS

DAC® FORMULA CALM B PASTE provides a balance of ingredients intended to support calm, balanced behavior in mature horses.

B-Vitamins – are water soluble vitamins including Thiamine (B1) Thiamine is required on a daily basis and is essential for normal muscle and nerve function. Thiamine also helps to maintain appetite. Thiamine is known to have a calming effect on the nervous function.

Magnesium – is a trace mineral that is an important ion in the blood, it plays an important role as an activator of many enzymes, and participates in muscle contractions. Signs of magnesium deficiency include nervousness, muscle tremors, and ataxia.

Taurine – is essential for cardiovascular function, and development and function of skeletal muscle, the retina and the central nervous system. Studies in other species have shown, taurine produces anxiolytic effect and may act as a modulator or anti-anxiety agent in the central nervous system by activating the glycine receptor.

Inositol – may have anti-anxiety properties.

Tryptophan - is the amino acid precursor for serotonin, a neurotransmitter implicated in sedation, inhibition of aggression, fear and stress.

FEEDING DIRECTIONS

DAC® FORMULA CALM B PASTE can be fed with either fortified or unfortified grains. Fortified grains contain added vitamins and minerals. Feed DAC® FORMULA CALM B PASTE at the following rates:

Based on 1000 lb. Horse

Use ½ a tube one to three times daily before and during events.

Cautions: Safe use in pregnant animals or animals intended for breeding has not been proven. If animal's condition worsens or does not improve, stop product administration and consult your veterinarian.
